

DETECCION DE SANGRE Y LIQUIDOS BIOLOGICOS

SANGRE:
Técnicas de adiestramiento similares a las de todos los productos químicos

↓

ATENCIÓN:
Adiestrar al perro con sangre humana .No Emplear sangre de personas enfermas,, post.pandriales, stresadas..... Usar sangre de personas de diferentes edades

DETECCION DE SANGRE Y LIQUIDOS BIOLOGICOS

ORINA:
Adiestrar al perro sobre el mayor numero de muestras diferentes
La orina es el liquido biologico mas variable

DETECCION DE SANGRE Y LIQUIDOS BIOLOGICOS

SPERMA:
Gran variabilidad de componentes bioquimicos.
Emplear el numero maximo de « donantes »

Meet Agriculture's Beagle Brigade!

Our dogs don't bite. They sniff baggage for prohibited fruit and vegetables. **ALIMENTOS PROHIBIDOS A LA IMPORTACION**

United States Department of Agriculture | Animal and Plant Health Inspection Service | Plant Protection and Quarantine

UMES Unité de médecine de l'élevage et des espèces

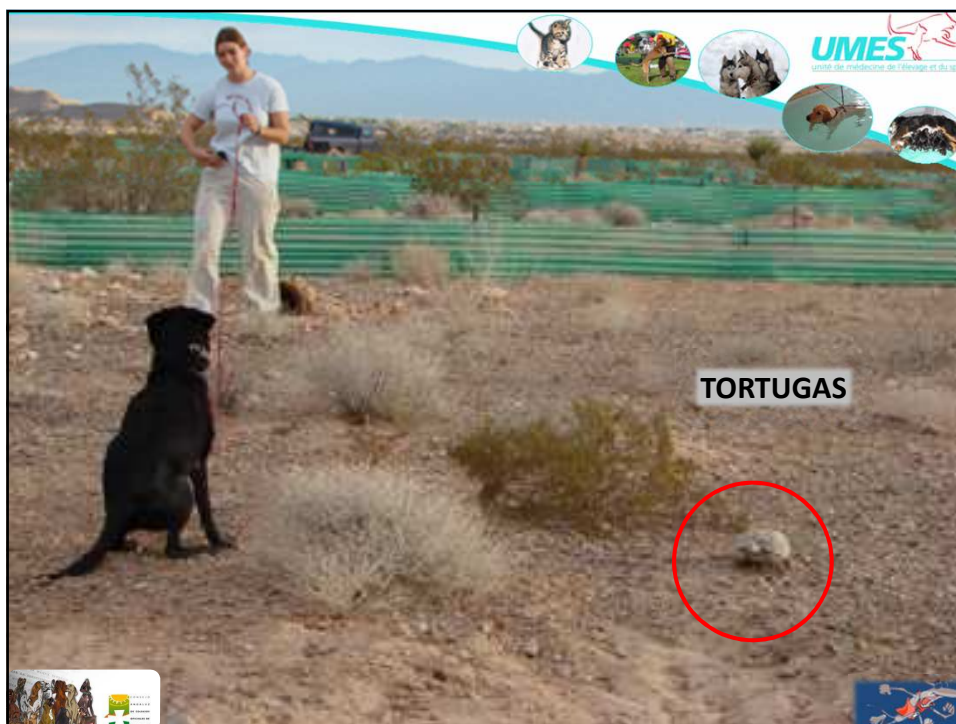

The advertisement features a large sign on the left with the title "Meet Agriculture's Beagle Brigade!" and a cartoon illustration of a beagle wearing a green vest with "BEAGLE BRIGADE" written on it, sniffing a suitcase. Below the illustration, text explains that the dogs sniff baggage for prohibited fruit and vegetables, with the Spanish phrase "ALIMENTOS PROHIBIDOS A LA IMPORTACION" highlighted in an orange box. Logos for the United States Department of Agriculture, Animal and Plant Health Inspection Service, and Plant Protection and Quarantine are also present. To the right of the sign are two photographs: the top one shows a beagle in a green vest sniffing a suitcase, and the bottom one shows a beagle in a green vest sniffing a cardboard box in an airport baggage claim area. A decorative banner at the top right contains the UMES logo and several small circular icons showing various animals.

PERROS DE AYUDA A LA CONSERVACION DEL MEDIO AMBIENTE

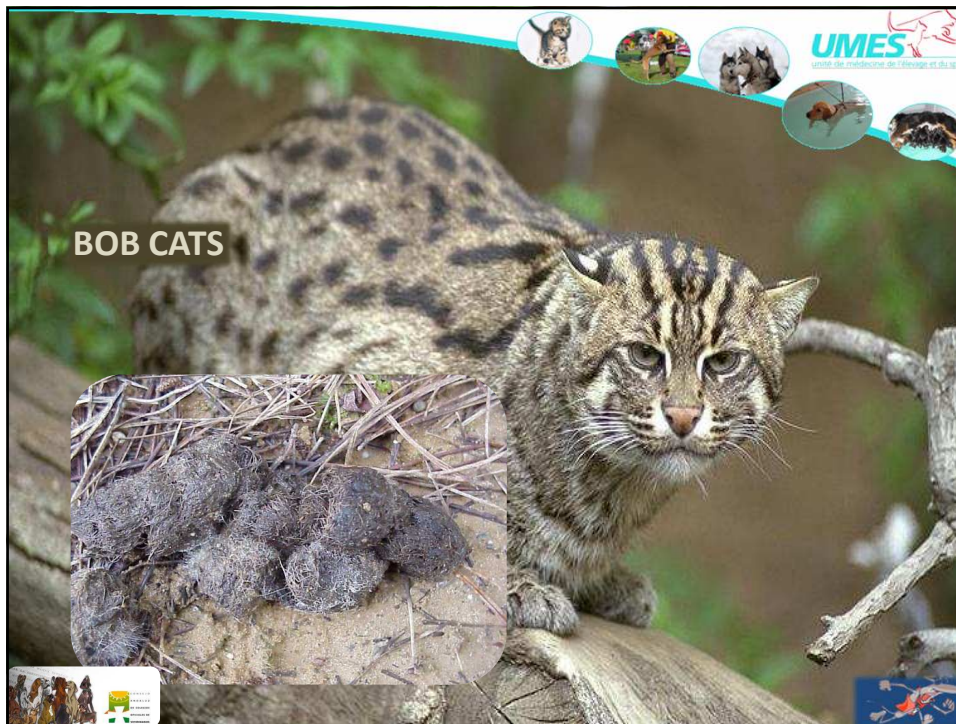

UMES Unité de médecine de l'élevage et des espèces

The advertisement features a photograph of a beagle dog sniffing the ground in a natural, outdoor setting. A yellow text box in the upper left corner contains the Spanish text "PERROS DE AYUDA A LA CONSERVACION DEL MEDIO AMBIENTE". In the top right corner, there is a decorative banner with the UMES logo and several small circular icons showing various animals.

Diabetics get dogs to sniff trouble
 Caroline Marcell | September 1, 2007

Friend indeed, Tala Greek and her puppy Roly, soon to be trained as a secure-alert dog.

TAUKA Greek's golden retriever puppy is more than just her best friend - she could potentially save her young owner from a life-threatening disease.

The eight-year-old was diagnosed with type 1 diabetes last year and has already been admitted to hospital several times with dangerously low blood-sugar levels.

This week, Tala's new puppy Roly will begin training as a secure-alert dog able to recognise when sugar levels are not right, preventing hypoglycaemic fits.

The dogs can provide secure alert by sniffing a person's armpits.

... a holiday on Hamilton Island last December, she could have prevented a terrifying accident.

"Tala started convulsing and she was looking right through me," Mrs Greek said from the family's St. Ives home. "I never mind being years off the life, it took years off mine, too."

The training director for Dogs for Diabetics, a non-profit organisation that places diabetes-alert dogs in homes, said the concept was still new in Australia, with just seven dogs
