Do you know the WAF ?

-By Deguernel Ken-

I don't talk about the canine's onomatopoeia but about the Woman Acceptance Factor.

The WAF, also say Wife Acceptance Factor, is a concept completely serious come from the Hi-fi and home cinema's industry, in the end of the 80's. At this time, the manufacturer noticed a feminine front against the device which invaded the living rooms and which were formed for men find it attractive. In short, a big black hi-fi system with a lot of button, three remote control, six element piled, twenty meters of cable, two huge amplified studio monitoring speakers, it's not WAF. Conversely, a trendy hi-fi system, sober, wood and metal, with some little white spherical speakers without cable and hidden all over the room, with three blue luminous button in front, it's WAF.

So, the Hi-fi and Home cinema's industrial have launch any project of « WAFing » of them material, like the only remote control which make it possible to avoid the proliferation of the remotes control dedicated to a only device. They reflate themselves into the design and the ergonomy to vary the WAF rate's cursor between 0 : not WAF at all, and 1 : WAF total.

Since, another industry started the WAF : the car industry realized the importance of the WAF. Behind, to be serious, there is probably the independance of the woman in the decision financial of the couple. The time is end, where the woman at home awnser to the pedlar who come at her's place at 3:30 pm : « No, I can't buy you this object, my husband is not here... ».

Today, the woman work, won any money, and spend it like she want. And objectively, the preoccupation esthetic and ergonomic is more feminine than masculine even if we don't have to be so manichean in the cliché.

The summon WAF of WAF, is the Ipod, triumph of the ergonomy and design in front of the bag of tricks, and huil fart machine, which is attractive for the men. Of course, all of that is completely cliché. All the men aren't big hairy geek... some men like the harmony, the design, the ergonomy... It's moreover, more and more the case. The crazy hacker's time, it's over, when we was seventeen, it's was funny... Today, we want the technology work now.

As a result, the WAF is become a concept for us, the men ! There we have the impression somebody gonna sell you a formula one, or a electric shaver... The WAF is become the Masculine Acceptation Factor, for exemple : do the shopping, it's WAF ; go drink a beer after the work with the colleage, it's not WAF... WAF or not WAF, that is the question would wonder Hamlet in our time.

It's very ludic to use the WAF, and you can use it yourself in your day to day life : buy a new computer when the last have less than six month, not WAF especially if it is on the living-room ; buy a new furniture with an aspect more design to put your CD, it's WAF ; the holidays at mother-in-law place : WAF ; the holidays in a relaxation center with a lot of beautiful lady : not WAF.

In short, all in the couple life can be judged WAF or not WAF. Of course, this presupposes that you are in couple, and the use of the WAF become a game to do vary an activity not WAF, to an activity WAF total..

Now, the only question you have to ask to yourself is « read this paper is WAF or not WAF in your couple » ??!

Cat : DEAD & ALIVE !

-By Lechevalier Anthony & Cléradin Rémi-

Erwin Schrödinger was a quantum physician who created an experience which put a cat in a state of death and life in the same time. The experience consist of put a cat in a box with a radioactive detector which remark the cell crumbling, that release the destruction of a bottle contening a radioactive product whose aim is to stop the cell crumbling. In this way, the cat is theoreticaly in a state of death and life.

However, it's not so easy !
