## Liquids

Eau

For the size of fat batch that you are using, we recommend that you use approximately **194 to 291 milliliters of liquid.**

**WARNING:** Always add your solid form lye, sodium hydroxide or potassium hydroxide, to the liquid. If the liquid were added to the solid form lye a violent reaction could result. This means you could have a "volcano" erupt out of your container.

## Fats & Oils

Fat	Amount (grams)	% in recipe
Castor Oil	38	4.90
Coconut Oil	338	43.56
Olive Oil	300	38.66
Soybean Oil	100	12.89
Total Weight	776	

## Lye Table (KOH)

% excess fat	Lye Amount (grams)
0	170.06
1	168.35
2	166.65
3	164.95
4	163.25
<b>5</b>	<b>161.55</b>
<b>6</b>	<b>159.85</b>
<b>7</b>	<b>158.15</b>
<b>8</b>	<b>156.45</b>
9	154.75
10	153.05

0% to 4% excess fat range: Proceed with caution! We do not recommend this unless actual saponification values are known and used.

5% to 8% excess fat range: This is the range we use most often.

9% to 10% excess fat range: Creates a softer soap because of the amount of excess fat.

**DISCLAIMER:** Every effort has been made to ensure that the information contained here is accurate. However due to differing conditions, tools, and individual skills we cannot guarantee the information is applicable in your situation. We are not responsible for any injuries, losses, or other damages that may result from the use this information available here.

Always wear protective goggles, gloves and other safety clothing when handling sodium hydroxide or potassium hydroxide. Refer to the appropriate MSDS for complete details.

**Notes**

J'ai utilisé de l'huile de Soja au lieu de l'huile de Babassu préconisée. J'ai également utilisé du Macérat de brocoli (sur ricin et coco) au lieu de l'huile de Ricin également préconisée (dans mon calcul j'intègre 50% de coco en plus et 50% de ricin) ce qui me donne

- 100 gr soja
- 38 gr ricin
- 38 gr coco + 300 gr (vegetaline)
- 300 gr olive

Current Batch	Resized Batch	
776	776	Grams
