

# GM / non-GM maize coexistence in Spain

## Background information on Bt maize in Spain (2010)

67.726\* ha, 21% of the total 322.500 ha of grain maize

**101 varieties** of Bt maize registered in the Spanish Catalogue in 2010  
(all derived from MON810) from 12 companies (124 in 2009)

<http://www.marm.es/app/regVar/ResBusVariedades.aspx?id=es>

**201 varieties** registered in the different Member States

Surface is lower when compared to 2009 (76.057 ha)

% is more or less the same (lower overall maize plantings)

There are **13 years of real coexistence** in Spain among biotech, conventional and organic farming

Source: MARM

Coexistence is a reality: after **13 years** of GM crops **there are no farmer litigations due to coexistence** among those planting conventional transgenic or organic crops

## *Statement by*

**Elena Espinosa**, Minister of Environment, Rural Affairs and Fisheries (Spain) in front of the European Parliament-  
EFE Newswire, 11.05.2010:

***“Me gustaría aclarar que no se ha producido niun sólo caso documentado por problemas de cultivos de maíz en el campo español; insisto, no hay ningún tipo de problema”***

***“I would like to clarify that no documented case due to problems of maize crops has taken place in the Spanish farming; I insist, there is not any kind of problem”,***
