

La multiplication : distributivité.

Calcule le nombre de carreaux.

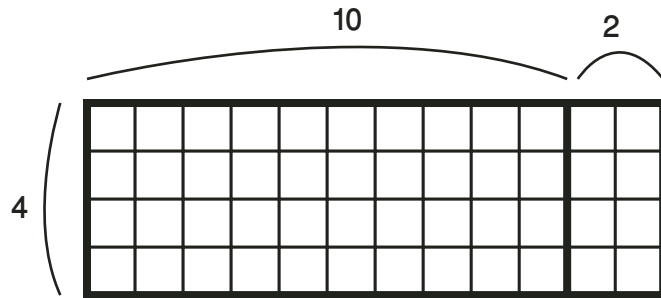

$$12 = \dots + \dots$$

$$12 \times 4 = \dots \times \dots + \dots \times \dots$$
$$= \dots + \dots$$

La multiplication : distributivité.

Calcule le nombre de carreaux.

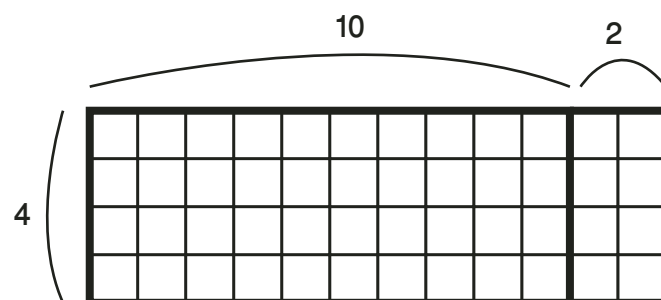

$$12 = \dots + \dots$$

$$12 \times 4 = \dots \times \dots + \dots \times \dots$$
$$= \dots + \dots$$

La multiplication : distributivité.

Calcule le nombre de carreaux.

$$12 = \dots + \dots$$

$$12 \times 4 = \dots \times \dots + \dots \times \dots$$
$$= \dots + \dots$$
